viral hepatitis & sexual health workforce

# TAS Could it be HIV? Clinical Indicators & Testing

**Date:** Thursday 09 May 2024

**Time:** 7:00pm – 8:00pm (AEST)

**Virtual Attendance:** Online – Zoom

## Description

With an estimated 2,020 individuals in Australia living with undiagnosed HIV, the need for vigilance and early detection remains crucial.

This webinar is designed for healthcare professionals who want to enhance their knowledge and skills in identifying, testing, and managing patients at risk of HIV. It will provide an overview of HIV screening and testing guidance as well as patient engagement and discussion strategies.

## Target Audience

GPs, nurses, and other primary healthcare professionals in Tasmania.

## Speakers

Dr Alvin Ding, Sexual Health Physician at Clinic 60 – Hobart.

## Learning Outcomes

- Explain the importance of screening and testing for HIV
- Identify and discuss behavioural and clinical indications for HIV testing
- Consider strategies for confidently discussing sexual health with patients
