viral hepatitis & sexual health workforce

# HIV Testing and PrEP Webinar

In Australia, almost 3000 people are living with undiagnosed HIV and as such cannot access life-saving treatment. The screening and testing of HIV can improve early detection rates and ensures patients receive the care they need. It can also identify high risk patients and provide them with the care and education to prevent the transmission of HIV.

In this webinar, health care professionals will learn why screening and testing for HIV is so important, how to recognise the clinical indicators for testing, and when it is appropriate to recommend PrEP.

**Date:** Thursday 27 June 2024

**Time:** 6:30pm – 7:30pm (ACST)

**Virtual Attendance:** Online – Teams

## Target Audience

This webinar is designed for South Australian university and travel medical services, and General Practitioners working in South Australia.

## Speakers

Dr Lane Hinchcliffe – Medical Lead, *Central Adelaide Local Health Network (CALHN)*

## Learning Outcomes

Following the webinar, participants will be able to:

- Explain the importance of screening and testing for HIV.
- Identify and discuss behavioural and clinical indications for HIV testing.
- Provide patient education on the effectiveness and appropriate use of PrEP.
