Curing Hepatitis C in Primary Care

Treatment with direct acting antivirals is easier than ever.
Increasing HCV treatment in primary care is crucial to achieving
HCV elimination in Australia by 2030

Time: Wednesday 25 September 2024

Date: 7:00pm to 9:00pm (AEST)

Venue: Online via Zoom – dial in link will be provided

Join our interactive course on HCV management in primary care!

This course aims to empower participants with the skills and confidence to diagnose, assess, manage, and treat hepatitis C (HCV) in primary care.

Newly designed program. Training delivery utilises a blended learning approach with expert-led presentations and facilitated case discussions delivered by specialists, General Practitioners, Nurse Practitioners and Peer/Lived Experience workforce with expertise in HCV management and treatment.

This training is for General Practitioners, Nurse Practitioners, other practitioners prescribing or intending to prescribe s85 direct-acting antiviral medication for HCV in primary care settings in NSW.

Learning outcomes:

- Identify when screening and testing for HCV is indicated
- Interpret HCV test results
- Discuss required pre-treatment assessments
- Determine which treatment, monitoring, and follow-up is required
