Developing a sustainable HIV,
viral hepatitis & sexual health workforce

Sexual Health in Primary Care

Dates and Times:

Session 1: Monday 4 November 2024, 6:30pm – 8:00pm (AEDT)

Session 2: Monday 11 November 2024, 6:30pm – 8:00pm (AEDT)

Virtual Attendance: Online - Teams

Description

This two-part online workshop provides primary care providers with the information and tools required to improve STI screening and care for priority populations. The workshop also addresses strategies available for the prevention of HIV transmission and highlights the importance of contact tracing and partner notification.

Target Audience

GPs, GP registrars, nurse practitioners, practice nurses, and other health professionals working in primary care settings.

Speakers

These sessions will be presented by Dr Jessica Tidemann and Dr Sama Balasubramania.

Learning Outcomes

- Demonstrate confidence in discussing sexual health with patients
- Explain the importance of screening and testing for STIs and BBVs
- Describe contact tracing and its key role in managing STIs
