# Curing Hepatitis C in Primary Care

Treatment with direct acting antivirals is easier than ever.  
Increasing HCV treatment in primary care is crucial to achieving  
HCV elimination in Australia by 2030

**Time:** Tuesday 19 November 2024

**Date:** 6:30pm to 9:00pm (AEST). Dinner and refreshments will be available from 6:45pm.

**Venue:** TBC, Brisbane

## Join our interactive course on HCV management in primary care!

This course aims to empower participants with the skills and confidence to diagnose, assess, manage, and treat hepatitis C (HCV) in primary care.

The training delivery utilises a blended learning approach with expert-led presentations and facilitated case discussions from a General Practitioner, Nurse Practitioner, and Peer/Lived Experience speaker.

**This training is for** General Practitioners, Nurse Practitioners, other practitioners prescribing or intending to prescribe s85 direct-acting antiviral medication for HCV in primary care settings in QLD. Nurses involved in the assessment and work-up of patients for treatment are also encouraged to attend.

## Learning outcomes:

- Identify when screening and testing for HCV is indicated
- Interpret HCV test results
- Discuss required pre-treatment assessments
- Determine which treatment, monitoring, and follow-up is required
