viral hepatitis & sexual health workforce

Curing Hepatitis C in Primary Care

Treatment with direct acting antivirals is easier than ever.
Increasing HCV treatment in primary care is crucial to achieving
HCV elimination in Australia by 2030

Time: Wednesday 27 November 2024

Date: 6:30pm to 9:00pm (AEDT). Dinner and refreshments will be available from 6:30pm.

Venue: TBC, Port Macquarie

Join our interactive course on HCV management in primary care!

This course aims to empower participants with the skills and confidence to diagnose, assess, manage, and treat hepatitis C (HCV) in primary care.

The training delivery utilises a blended learning approach with expert-led presentations and facilitated case discussions.

This training is for General Practitioners, Nurse Practitioners, other practitioners prescribing or intending to prescribe s85 direct-acting antiviral medication for HCV in primary care settings in the Port Macquarie area.. Nurses involved in the screening, assessment and work-up of patients for treatment are also encouraged to attend.

Learning outcomes:

- Identify when screening and testing for HCV is indicated
- Interpret HCV test results
- Discuss required pre-treatment assessments
- Determine which treatment, monitoring, and follow-up is required
