

QLD HIV Prescriber Update

Date: Thursday, 23 April 2026

Suitable for: HIV s100 prescribers and medical practitioners based in QLD.

Time: 7:00pm – 8:00pm AEST

Location: Online - Microsoft Teams

Learning Outcomes

- Describe the key factors that influence HIV risk and care needs in women.
- Apply evidence-based screening, prevention, and treatment guidelines for HIV in women.
- Demonstrate effective, stigma-free communication and patient-centred care to support women in accessing HIV testing, adhering to treatment, and navigating psychosocial challenges.

This 1-hour session will update HIV s100 prescribers and practitioners on new topics relevant to the management of people living with HIV in 2026. This update will focus on HIV and Women.

Featured speakers

- **Lisa Wang** - Medical Officer, Gold Coast Sexual Health Service
