

Viral Hepatitis for Nurses and Midwives Training Day

Date: Friday, 22 May 2026

Suitable for: Nurses, midwives, nurse practitioners

Time: 8:30am - 4:30pm AEST

Location: Rydges Sydney Central

This one-day face-to-face course provides nurses and midwives with practical knowledge and skills to support the screening, assessment, management and follow-up of hepatitis B and hepatitis C. Emphasis is placed on culturally responsive, stigma-free practice and the role of nurses and midwives in engaging and supporting people living with viral hepatitis.

Learning Outcomes

1. Identify opportunities for screening and testing, vaccination and linkage to care
2. Explore the role of nurses and midwives in providing culturally responsive care that is free of stigma and discrimination
3. Examine nurses' and midwives' roles in engaging people living with hepatitis B in ongoing monitoring and treatment
4. Examine the role of the nurse and midwife in models of care for HCV testing, treatment and follow-up.

Featured speakers

- **Cherie Bennett** | Nursing Policy and Advocacy Lead & Medical Educator at ASHM & Clinical Nurse Specialist, Sydney Sexual Health Centre
- **Kristen McKee** | Clinical Nurse Consultant- Hepatology| Royal Prince Alfred Hospital, SLHD
