

Hot Topic Webinar – Hepatitis B & Liver Cancer

Date: Wednesday, 10th June 2026

Time: 6:30pm - 8:00pm

Location: Online - Zoom

Suitable for: This webinar is intended for all healthcare professionals that are interested in hepatitis B and liver cancer working in QLD.

Learning Outcomes

- Describe the global and local epidemiology of hepatitis B and its link to hepatocellular carcinoma
- Recognise indications for liver cancer surveillance.
- Recognise early signs of malignancy and referral pathways

This hot topic webinar focuses on the impact of unmanaged chronic hepatitis B on primary liver cancer. This is one of the biggest known risk factors and this webinar will assist with understanding the statistics and when to support surveillance and referral.

Learn from experts in liver cancer treatment and join us for presentations and discussion on liver cancer data with Hepatitis Queensland and Cancer Council Queensland.

Featured speakers

- **Dr Melita Andelkovic** | Gastroenterologist and Hepatologist | Prince Alexandria Hospital
- **Cancer Council QLD**
- **Hepatitis Queensland**
