

Hepatitis C in AOD Settings: Practical Strategies and Service-Level Solutions

Date: Sunday, 8 November 2026

Suitable for: Clinical and non-clinical staff working across AOD care

Time: 3:30pm - 5:00pm (AWST)

Location: Esplanade Hotel Fremantle by Rydges, Walyalup, WA

Join colleagues from across the AOD and health sectors for a practical, interactive workshop focused on what works in real-world settings. Through discussion, case examples and implementation-focused strategies, participants will explore how to strengthen hepatitis C prevention, testing, treatment and referral pathways within their own services.

Whether you're new to hepatitis C care or looking to improve existing approaches, this session will provide practical tools, current clinical updates and achievable service-level solutions that can be applied immediately in practice. You'll also connect with others working towards better outcomes for people affected by hepatitis C.

Learning Outcomes

- Understand current hepatitis C transmission risks and harm reduction approaches
- Navigate testing, assessment, treatment, and referral pathways
- Communicate about hepatitis C in clear, supportive, and non-stigmatising ways
- Identify opportunities to strengthen hepatitis C responses within their service
- Support improved engagement, access to care, and continuity of treatment

This activity may be suitable for self-claiming 1.5 CPD hours with your professional body. A statement of attendance will be provided for full attendees.
